

evolveEA Full Time Position
Communication Designer

POSTED 24 JUNE 2011

evolveEA is looking for a talented designer to help us create graphically compelling ways to explore environmental ideas within our office and for our clients.

evolveEA is a nimble multidisciplinary practice situated at the intersection of sustainability and the built environment. We help individuals, communities, and organizations take strategic action by situating clients in a larger context of change, strengthening strategic positioning and enabling clients to demonstrate leadership.

Communication design is core to our practice. We work with abstract and sometimes complex ideas and rely on visualizations to help us and our clients understand (mounds of) data. In addition we learn best from other people, so communicating our ideas, work, and process is critical to enabling and inspiring others to action.

You could be a good fit for us if:

- You are passionate about **making complex ideas accessible** to others through visualizations, narratives, interfaces and experiences.
- **Thinking strategically and systemically** is second nature to you but you also enjoy rolling up your sleeves to **get the work done**.
- You have knowledge about and interest in sustainability, green buildings, and the built environment. You have a **strong desire to use design for positive environmental and social impact**.
- You **create in order to communicate** and are able to inspire others to do the same.
- You can **innovate** and help a fun, hard-working, socially-conscious firm break new ground.

We need you to:

- Be a design ambassador internally and externally by identifying and evangelizing best practices and contributing to office culture and practices.
- Demonstrate excellent design skills across multiple media and have an eye for detail.
- Work within our current brand identity and innovate our graphic systems.
- Possess the ability to inspire teams through collaboration as well as direction, vision and planning. You should be able to articulate your vision and seek critique to make it better.
- Be a highly organized self-starter with the ability to multitask, manage deadlines and work with others to accomplish the task at hand.
- Have software expertise in the Adobe Suite, HTML, CSS, and PHP web development, 3D modeling programs, or other programs necessary to the performance of the above tasks.

Specific tasks include:

- Project management for communications/education initiatives including signage, print material, presentations and/or web material.
- Working closely with project managers and principals to develop content and materials for in house and client work.
- Creation and management of firm marketing material including print and electronic media, including website design and management.

Qualifications

Bachelor's Degree in Design with an emphasis in Communication Design. Professional experience preferred. Degrees, coursework, or certifications (such as LEED Accredited Professional) in environmental areas is desirable.

If this sounds like you, please send an email to employment@evolveEA.com and attach your resume, cover letter, and work samples. If this doesn't sound like you but you know someone who might be a good fit, please pass it on!
